

Wallace TX Extant Data Analysis Findings

Goal

The goal of this analysis is to examine if trends exist in how Texas (TX) districts access resources.

Data

The primary data used for this analysis is the 2019-20 list of TX Public Schools from the National Center for Education Statistics (NCES). The Texas Education Agency (TEA) provided 4 datasets to indicate different resources used by TX districts, including Summer Learning Framework (SLF), Additional School Years Funding (ADSY) from 2021-23, 21st Century Community Learning Centers (21st CCLC), and COVID Recovery Instructional Materials Support Initiative (CRIMSI). The American Institutes for Research (AIR) study team also included variables to indicate districts who started and finished the ADSY PEP cohort.

Specific district characteristics were examined for analysis, including: Size of the District (number of students), Percent of Students with Individualized Education Programs (IEPs), Percent of Students who are Hispanic, Percent of Students who are Black or African American, Percent of Students who are Economically Disadvantaged (as evidenced through free and reduced price lunch), and District Rating. Percent of Students who are Hispanic, Size of the District (number of students), Percent of Students with Individualized Education Programs (IEPs), and Percent of Students who are Black or African American were retrieved from NCES. District Rating was sourced from TEA. Percent of Students who are Economically Disadvantaged was publicly retrieved from TEA's Texas Academic Performance Report (TAPR) Data.

TEA provided District Ratings in the form of a letter scale (A, B, C, D, E, F). AIR converted letters to numeric scores in ascending order from letter F (F=1, D=2, C=3, B=4, A=5). By converting letter scales to numeric, the study team is able to calculate correlational analyses using District Rating. When interpreting this variable and its correlations, consider a higher score to be a more proficient rating.

Descriptive Analysis

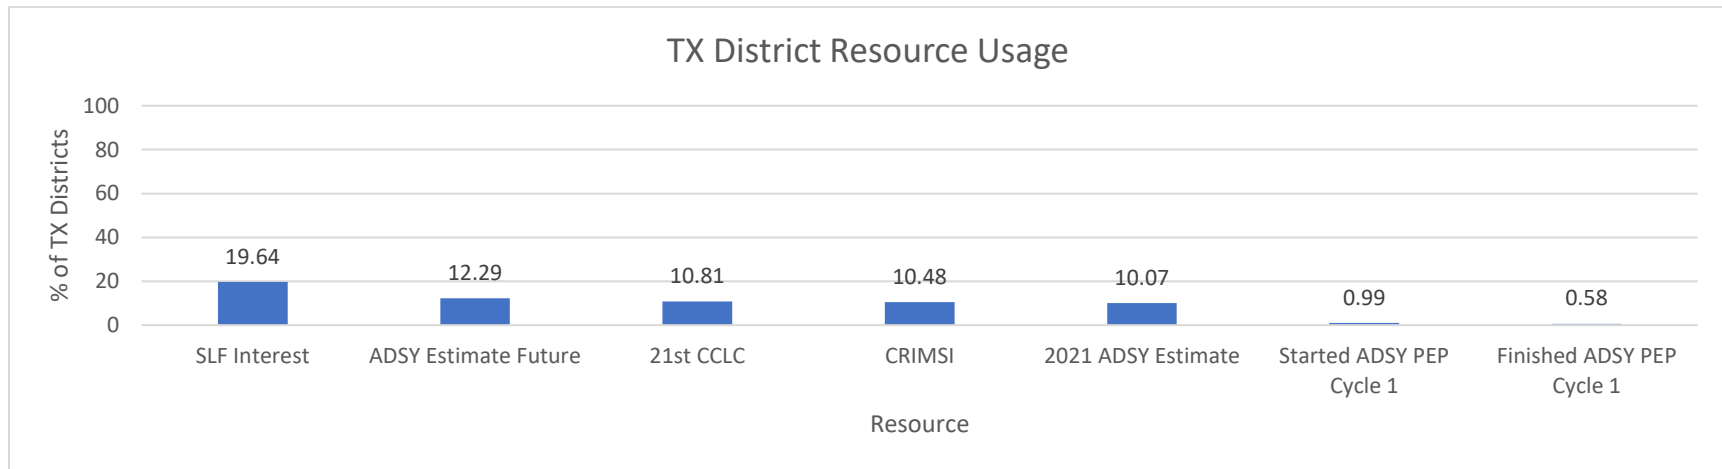

There were 1,212 districts in the state of Texas in 2019-20, as sourced by NCES data. TEA provided information on which resources each district has accessed, as shown below. For a full list of districts accessing each specific resource, please see [Appendix A](#).

Table 1. Resource Accessed by TX Public School Districts

Resources Used	Freq.	Percent
SLF Interest	238	19.64
ADSY Estimate Future	149	12.29

CRIMSI	127	10.48
2021 ADSY Estimate	122	10.07
Started ADSY PEP Cycle 1	12	0.99
Finished ADSY PEP Cycle 1	7	0.58

Figure 1. TX District Resource Usage

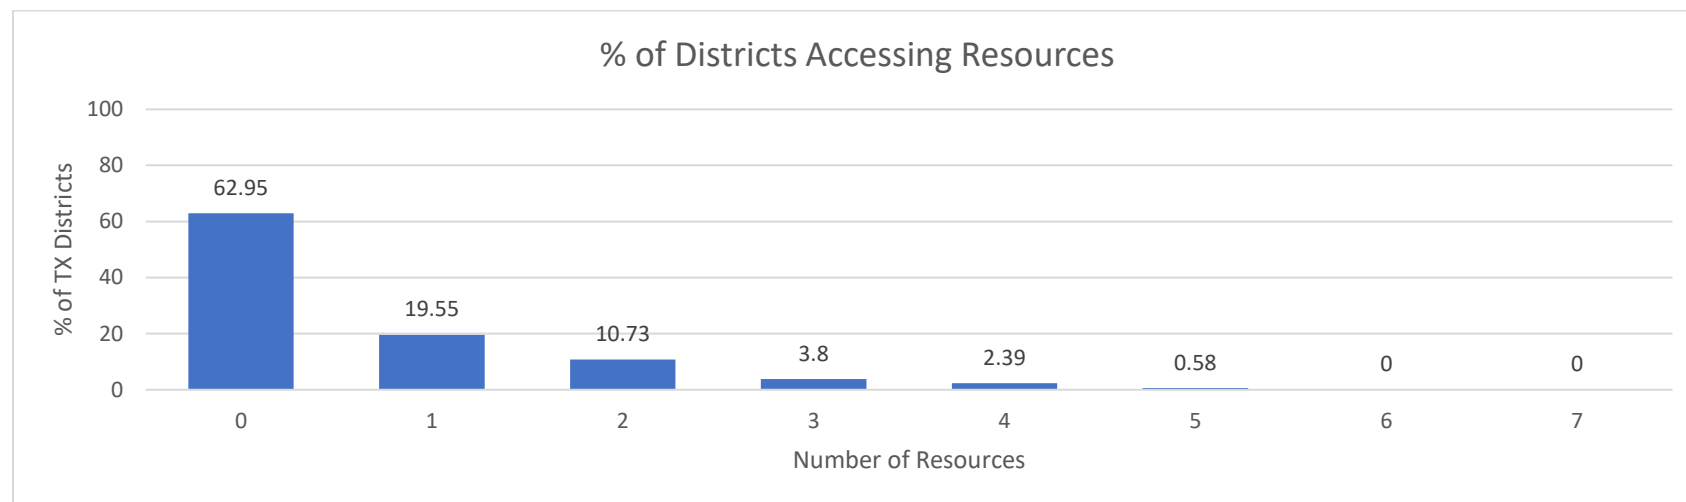

AIR created a variable to count how many resources each district has used. The data is left-skewed, meaning the frequency of districts decreases as the number of resources increase. For a full list of districts accessing resources by resource count, please see [Appendix B](#).

Figure 2. Total Number of Resources Accessed by TX Public School Districts

As noted above, the goal of this analysis is to examine if trends exist in how districts access resources. District characteristics were retrieved from NCES based on variables that may be related to resource usage. In table 3 we provide descriptive statistics for each district characteristic of interest.

Table 3. Descriptive Statistics of District Characteristics

Correlational Analysis

The AIR study team utilized correlational analyses to examine if relationships exist in how TX districts use resources. These analyses were grouped into two categories to examine trends: correlations by total number of resources used, and correlations by specific resource. Significance of all correlations was interpreted using the .05 alpha-level. In each section, correlations were calculated with student to teacher ratio. All correlations on this variable were insignificant and are not reflected below.

Correlations by Number of Resources

Correlating different district characteristics with the number of resources a district uses provides information on if there are trends in districts who access more resources.

Table 4. Relationship between the number of resources a district uses and district characteristics

District Characteristic	r ²	p-value	n
Percent of Students who are Hispanic	0.35	0.00	1,205
Percent of Students who are Economically Disadvantaged	0.27	0.00	1,202
District Size	0.26	0.00	1,205
District Rating	-0.17	0.00	1,178
Percent of Students who are Black or African American	0.13	0.00	1,205
Percent of Students with Individualized Education Programs (IEPs)	-0.06	0.03	1,205

As shown above, the strongest relationship was found with the number of resources used and the percent of students who are Hispanic. This means as the percent of students who are Hispanic at a district increases, it is likely the number of resources a district accesses will increase as well. The relationship is considered moderately weak, with a correlation coefficient of .30.

Negative correlations were found when correlating the number of resources used with district rating and percent of students with IEPs. This means that as the number of resources increases, the district rating and the percent of students with IEPs decrease. The correlations for these resources are weak, however.

The study team also correlated the number of resources used with each specific resource. This provides information on if districts who access a specific resource are more likely to access more resources overall.

Table 5. Relationship between number of resources a district uses and usage of a specific resource

Resource Type	r ²	p-value	n
ADSY Estimate Future Funds	0.72	0.00	1,212
SLF Interest	0.63	0.00	1,212
2021 ADSY Estimate	0.61	0.00	1,212
CRIMSI	0.52	0.00	1,212
21st CCLC	0.51	0.00	1,212
Started ADSY PEP Cycle 1	0.29	0.00	1,212
Finished ADSY PEP Cycle 1	0.28	0.00	1,212

As shown above, there is a strong positive relationship between the number of resources a district uses and engaging with ADSY Funds in the Future and SLF Interest. This is not surprising, as the largest number of districts engaged with these two resources (as shown in Table 1).

Correlations by Type of Resources

Correlating different district characteristics with the type of resources a district uses will demonstrate if trends exist in how districts access specific resources. Findings shared below are organized by resources type in descending order of correlation coefficient.

Discussion

Overall, correlations of district characteristics with different resources were moderately weak (all significant correlation coefficients less than +/- .30). Correlation coefficients greater than +/- .20 are of the most interest, and are provided again below for review:

Table 13.

Correlation	r ²	p-value	n
SLF Interest and District Size	0.28	0.00	1,205
ADSY Future Fund Estimates and Percent of Students who are Hispanic	0.26	0.00	1,205
21st CCLC and District Size	0.25	0.00	1,205
21st CCLC and Percent of Students who are Hispanic	0.23	0.00	1,205
ADSY 2021 Fund Estimates and Percent of Students who are Hispanic	0.22	0.00	1,205
21st CCLC and Percent of Students who are Economically Disadvantaged	0.22	0.00	1,202
SLF Interest and Percent of Students who are Hispanic	0.21	0.00	1,205

It is evident that the strongest relationships are most often with district size and percent of students who are Hispanic. In other words, as a district's percent of students who are Hispanic increases, they more often also engage with ADSY Future Estimates, 21st CCLC, ADSY 2021 Estimates, and SLF interest. As a district's size increases, they more often also engage with SLF interest, and 21st CCLC.

Additionally, Starting and Finishing ADSY PEP Cycle 1 had negligible correlation coefficients (less than +/- .10) with all district characteristics. Low correlations for starting and finishing ADSY PEP Cycle 1 are likely be due to low participation rates in the specific resources (n=12 starting and 7 finishing) and should be interpreted with caution.

District Characteristic Correlations

Upon reviewing correlational findings, the team inquired if a relationship exists between district size and percent of students who are Hispanic. The study team found a marginal, significant positive relationship between these two variables ($r(1,205) = .13$, $p = 0.00$).

Correlations within Types of Resources

We can also determine if there is a relationship between a district using a specific resource, and also using another. These variables are all binary (“Yes” or “No”), and may not provide as rich of information as the ordinal variables above.

Chi-Square Analyses

Chi-square analyses provide information on if the observed value of a variable is what value would be expected, based on the distribution of the data. The AIR study team conducted chi-square analyses to determine if the distribution of resources accessed is what would be expected when grouped by TEA District Locale Type. For more information on TEA District Types and a glossary of terms, please see [Appendix C](#). Values highlighted below in green were statistically significant, meaning the number of districts within the locale type who accessed the specific resource were lower or higher than what was expected. The larger value between actual and expected values is bolded.

	Expected	373.7	91.3	407.6	57.4	418	47	416.1	48.9	414.5	50.5

As shown above, several district types accessed resources in greater frequency than would be expected based on the distribution of the data. Additionally, rural districts often accessed resources less frequently than would be expected. Significant values are reiterated below:

ANOVA Analyses

Analysis of Variance (ANOVA) analyses provide information on if the average value of a variable is different by group membership. The AIR study team conducted ANOVA to determine if differences are present in the average number of Hispanic students at each TEA Defined District Type. The team found significant differences of percent of students who are Hispanic between TEA defined district types [$F(9, 1,194) = 8, p = 0.00$]. Post hoc analyses revealed the TEA defined district types that drive these significant differences, as shown in Table 17.

Table 17. Post hoc ANOVA Analyses

<ul style="list-style-type: none"> • Charter School Districts • Independent Town • Major Suburban • Non-metropolitan Fast Growing • Non-metropolitan Stable • Other Central City 	<ul style="list-style-type: none"> • Rural

Post hoc analyses reveal that Major Urban Districts tend to have more students who are Hispanic than several other district types. Additionally, post hoc analyses reveal that Rural Districts tend to have less students who are Hispanic than several other district types.

District Type Glossary of Terms, 2018-19

TEA District Types

The following paragraphs explain TEA district type classifications.

Major Urban (11 districts). A district is classified as major urban if: (a) it is located in a county with a population of at least 1,020,000; (b) its enrollment is the largest in the county or at least 70 percent of the largest district enrollment in the county; and (c) at least 35 percent of enrolled students are economically disadvantaged. A student is reported as economically disadvantaged if he or she is eligible for free or reduced-price meals under the National School Lunch and Child Nutrition Program.

Example:

Austin ISD (227901) is in Travis County, which has a population of 1,260,620. Austin ISD's enrollment of 79,787 students is the largest enrollment in the county, and at least 35 percent of the enrolled students are economically disadvantaged.

Major Suburban (79 districts). A district is classified as major suburban if: (a) it does not meet the criteria for classification as major urban; (b) it is contiguous to a major urban district; and (c) its enrollment is at least 3 percent that of the largest contiguous major urban district or at least 4,500 students. A district also is classified as major suburban if: (a) it does not meet the criteria for classification as major urban; (b) it is not contiguous to a major urban district; (c) it is located in the same county as a major urban district; and (d) its enrollment is at least 15 percent that of the largest major urban district in the county or at least 4,500 students.

Examples:

Castleberry ISD (220917) is in Tarrant County, which has a population of 2,064,380 but it does not meet the criteria for classification as major urban. Castleberry ISD is contiguous to Fort Worth ISD, a major urban district, and its enrollment of 3,780 students is greater than 3 percent that of Fort Worth ISD.

Goose Creek CISD (101911) is in Harris County, which has a population of 4,714,391 and contains at least one district classified as major urban. Goose Creek CISD does not meet the criteria for classification as major urban, nor is it contiguous to a major urban district. Although Goose Creek CISD's enrollment of 23,765 students is less than 15 percent that of Houston ISD, the largest major urban district in Harris County, it exceeds 4,500 students.

Other Central City (38 districts). A district is classified as other central city if: (a) it does not meet the criteria for classification in either of the previous subcategories; (b) it is not contiguous to a major urban district; (c) it is located in a county with a population of between 100,000 and 1,019,999; and (d) its enrollment is the largest in the county or at least 75 percent of the largest district enrollment in the county.

Examples:

Brownsville ISD (031901) is in Cameron County, which has a population of 425,849. Brownsville ISD does not meet the criteria for classification in either of the previous subcategories, and it is not contiguous to a major urban district. Brownsville ISD's enrollment of 44,356 students is the largest in the county.

La Joya ISD (108912) is in Hidalgo County, which has a population of 890,414. La Joya ISD does not meet the criteria for classification in either of the previous subcategories, and it is not contiguous to a major urban district. Although La Joya ISD's enrollment of 27,998 students is not the largest in the county, it is at least 75 percent of the largest district enrollment in the county.

Other Central City Suburban (164 districts). A district is classified as other central city suburban if: (a) it does not meet the criteria for classification in any of the previous subcategories; (b) it is located in a county with a population of between 100,000 and 1,019,999; and (c) its enrollment is at least 15 percent of the largest district enrollment in the county. A district also is other central city suburban if: (a) it does not meet the criteria for classification in any of the previous subcategories; (b) it is contiguous to an other central city district; (c) its enrollment is at least 3 percent that of the largest contiguous other central city district; and (d) its enrollment is equal to or greater than the median district enrollment for the state of 897 students.

Examples:

Harlingen CISD (031903) is in Cameron County, which has a population of 425,849. Harlingen CISD does not meet the criteria for classification in any of the previous subcategories. Its enrollment of 18,574 students is greater than 15 percent of the largest district enrollment in the county.

Port Arthur ISD (123907) is in Jefferson County, which has a population of 253,046. Port Arthur ISD does not meet the criteria for classification in any of the previous subcategories. Port Arthur ISD is contiguous to Beaumont ISD, an other central city district that also is the largest district in the county. Port Arthur ISD's enrollment of 8,132 students is at least 3 percent that of Beaumont ISD and is equal to or greater than the median district enrollment for the state of 897 students.

Independent Town (67 districts). A district is classified as independent town if: (a) it does not meet the criteria for classification in any of the previous subcategories; (b) it is located in a county with a population of 25,000 to 99,999; and (c) its enrollment is the largest in the county or is at least 75 percent of the largest district enrollment in the county.

Examples:

Victoria ISD (235902) is in Victoria County, which has a population of 92,059. Victoria ISD does not meet the criteria for classification in any of the previous subcategories. Its enrollment of 14,039 students is the largest in the county.

Winnsboro ISD (250907) is in Wood County, which has a population of 45,229. Winnsboro ISD does not meet the criteria for classification in any of the previous subcategories. Its enrollment of 1,490 students is at least 75 percent of the largest district enrollment in the county.

Non-Metropolitan: Fast Growing (31 districts). A district is classified as non-metropolitan: fast growing if: (a) it does not meet the criteria for classification in any of the previous subcategories; (b) it has an enrollment of at least 300 students; and (c) its enrollment has increased by at least 20 percent over the past five years.

Example:

Sunnyvale ISD (057919) is in Dallas County, which has a population of 2,650,320. Sunnyvale ISD does not meet the criteria for classification in any of the previous subcategories. Sunnyvale ISD has an enrollment of 1,880 students, and its enrollment has increased by at least 20 percent over the past five years.

Non-Metropolitan: Stable (166 districts). A district is classified as non-metropolitan: stable if: (a) it does not meet the criteria for classification in any of the previous subcategories; and (b) its enrollment is equal to or greater than the median district enrollment for the state.

Example:

Snyder ISD (208902) is in Scurry County, which has a population of 17,129. Snyder ISD does not meet the criteria for classification in any of the previous subcategories. Its enrollment of 2,656 students exceeds the median district enrollment for the state of 897 students.

Rural (466 districts). A district is classified as rural if it does not meet the criteria for classification in any of the previous subcategories. A rural district has either: (a) an enrollment of between 300 and the median district enrollment for the state and an enrollment growth rate over the past five years of less than 20 percent; or (b) an enrollment of less than 300 students.

Examples:

Mason ISD (157901) is in Mason County, which has a population of 4,340. Mason ISD has an enrollment of 714 students and an enrollment growth rate over the past five years of less than 20 percent.

Buena Vista ISD (186901) is in Pecos County, which has a population of 14,870. Buena Vista ISD has an enrollment of 255 students and an enrollment growth rate over the past five years of more than 20 percent.

Charter School Districts (179 districts). Charter school districts are open-enrollment school districts chartered by the commissioner of education with final approval for operation provided by the State Board of Education. Established by the Texas Legislature in 1995 to promote local initiative, charter school districts are subject to fewer regulations than other public school districts. Generally, charter school districts are subject to laws and rules that ensure fiscal and academic accountability but that do not unduly regulate instructional methods or pedagogical innovation. Like other public school districts, charter school districts are monitored and accredited under the statewide testing and accountability system.

Example:

George I. Sanchez Charter School (101804) is in Harris County, which has a population of 4,714,391 and the charter district has an enrollment of 972 students.

NCES District Types

The National Center for Education Statistics (NCES) classifies districts using factors such as population size and proximity to urbanized areas. The NCES places districts into 12 categories, also known as locale classifications or locale codes. The NCES locale framework is composed of four basic types (City, Suburban, Town, and Rural). Each type comprises three subtypes. The subtypes are differentiated by size (in the case of City and Suburban assignments) and proximity (in the case of Town and Rural assignments). Within the NCES system, charter school districts are assigned one of the

twelve categories; there is not a separate category for charter school districts. For additional information about the locale framework, see the [NCES Locale Boundaries User's Manual](#).
